

Scotch Vinyl Electrical Tape, Black, 19mm x 20m (3/4 in x 66 ft)

Model : Super 33+

Product Details

- Highly conformable with good flexibility – for moisture-tight electrical and mechanical protection with minimum bulk
- Keep a high level of performance in ambient temperatures up to 105°C
- Suitable for cold weather applications down to – 18°C, without becoming brittle
- UL, CSA and VDE approved

Scotch Vinyl Electrical Tape Super 33+ is the original, market-leading PVC insulating tape. This professional grade tape is highly conformable, with good flexibility for moisture-tight electrical and mechanical protection.

Designed for primary electrical insulation for all wire and cable splices rated up to 600V Scotch Super 33+ Vinyl Electrical Tape is the original, market-leading PVC insulating tape. This professional grade tape combines an elastic backing with an aggressive adhesive – for moisture-tight electrical and mechanical protection with minimum bulk. Suitable for cold weather down to -18°C, this tape remains highly conformable and flexible without becoming brittle. It keeps a high level of performance in ambient temperatures up to 105°C.

Specifications	
Adhesive Type	Rubber
Applications	Insulation
Backing (Carrier) Material	PVC
Brands	Scotch
Dielectric Strength	1150 V/mil
Elongation at Break	250.0 Percent
Insulation Resistance	> 10 ⁶ megohms
Maximum Operating Temperature (Celsius)	105 °C
Minimum Operating Temperature (Celsius)	-18 °C
Product Color	Black
Shelf Life	5 Year
Tape Grade	Professional
Tensile Strength (metric)	26 N/cm
Total Tape Thickness without Liner (metric)	0.178 mm
Voltage Rating	600 V
Overall Length (Metric)	20 m
Overall Width (Metric)	19 mm
